of 210,000,000.

It is said that the disputed boundary question between the Provinces and Canada is about to be finally settled, and, it is confidently predicted, in favor of the former. The territory in dispute is a valuable tract of country, to the north of the present boundary, containing fully 3,000,000 acres, much of it of excellent quality for agricultural purposes, and all of it well timbered. The present area of New-Brunswich is 18,907,360 acres, to which if this disputed territory be added, the area of the Province will be nearly, if not quite, 22,000,000 of acres. The population of New-Brunswick is about 230,000.

Hour Law to come into operation, the cotton factories have all reduced the wages-usually from one half to an entire day's pay in the week. This is really hard, as the poor operatives were barely able to make a living before the reduction took place. The hands in consequence all struck work. To-day (Wednesday) I observe, however, that a good number have returned to their work in several of the mills, the

employers compromising the matter with them. In our present circumstances, it is difficult to look this question fairly in the face. In many of the mills the machinery is of a very imperfect kind, add to which, it is so much worn, and the capital invested so small, that there is less chance of competing with the Eastern manufacturers than these have with the

The New Postage Law

Messes Epirons: If the decision give en by Mr. Warren and published in The Tribune of this morning, be correct, it is evident that the new cheap postage law is not yet quite perfect. This decision unexpectedly enlarges the class of transient newspapers, enhances, from three to six times, according to the distance, the rate of postage on a certain class of newspapers "sent from the office of publication to bona fide subscribers." If such of publication to bona fide subscribers." If such be the meaning of the law, it only adds to the inconvenience already felt in regard to "transient" newspapers, and furnishes a new reason for a modification of the rate of postage on these last. The present rate, as established by the new law, is virtually prohibitory. Formally, after reading my morning and evening papers, I sent them, at a prepayment of 3 cents per diem or \$9 per annum to a friend in the country. Now, the rate is at least double, or nearly twenty dollars per annum! This, few can, or will afford. Nor is it reasonable, when the same papers sent from the offices of publication would be but \$4 per annum, for both. One cent prepaid for any transient newspaper is a sufficient rate, and is both simple and convenient besides. The present inconvenience is increased by the necessity of weighing, so as to determine the payment of the rate per ounce. If these rates are to continue, they will effectually diminish the revenue of the Post Office by excluding a great number of transient newspapers from the mail, and at the same time hinder a great public convenience. Ought not a petition or memorial to be sent to Congress, in order that this defect may be remedied?

To the Editor of The Tribune : In your number of to-day you state that

the unfortunate patriots were expelled from the several Cantons of Switzerland—Geneva excepted. I beg. to correct this mistake. Geneva was the first Canton of Switzerland which drove away German patriots. Mr. James Fazy, the President of the Canton of Geneva, did what he thought to be his duty in the most brutal manner. I and my lady, who had spent the months of July, August and September, 1849, in Geneva, were arrested by his orders and carried away by force. In the midst of the night we were left on the road in summer dress with the intimation that if we should return to the Canton of Geneva I should be treated with all the rigor of the law.

For the sake of truth I wish you would publish in your journal these few lines.

I am, sir, respectfully yours.

What then? Are we to return to the old soul-degrading system? Is the characteristic of this century backwords? Or is the deficiency of machinery to be made up by the extra wear and tear of the human machine?

tury backwards? Or is the deficiency of machinery to be made up by the extra wear and tear of the human machine?

Every reform carries evils in its train of a very serious character. Since the incorporation of this place the City Council have licensed no less than twenty extra taverus. There is scarce a street where these horrible land pirates have not hung out their "false colors" by day, and their "false lights" by night, for the seduction of our numerous ignorant and thoughtless youth.

We are still further even behind Jersey in our other reforms. While obliged by both moral and physical force to open Free Schools, we have set one man not only to manage but to teach 150 bovs, gathered off the street, in all the branches of an English education. Is it much wonder that Free Schools lie under an odium! Leaving out the management altogether, I should like to see some Vale Professor proposing to teach half a dozen branches successfully! There is not even a single dollar to spare for Evening Schools, Lectures, Lyceums, Libraries, or any other means of instruction. Sunday School Libraries are quite sufficient for such a place, of course! Boys, cease taking about drudgery and labor. Go back to your brick-making again. If they even deny you straw, no matter for that—you are better thus employed than receiving the education which the City Fathers have prepared for you. Give me a mill before a tavern yet!
